SSC, (Percentage - 82.00) — *Soegaon, Maharastra*

Experience

Tropon Technology — Dec 2023 – March 2024
Front-End Developer Trainee — *Pune, Maharastra*

- Developed a service to automatically perform a set of unit tests daily on a product in development in order to decrease time needed for team members to identify and fix bugs/issues.
- Contributing to team knowledge sharing by participating in code reviews, Implementing and testing application functionality to ensure successful operations across all platforms
- Working with designers and back-end developers to implement website features and functionality, test files, running the tests, and generating a report of the results once per day.
- Regularly debugging code and maintaining quality standards.

Projects

Task Manager | *ReactJs, json-server* — March 2023

- Ideally, a task is added and categorized in a couple taps or keystrokes. If adding your to-dos is a hassle, you just won't do it.
- Tags, lists, projects, and due dates are all helpful, and the best to-do apps offer at least a few categories like this.
- The best to-do app fits into your workflow, so you can get back to what you're supposed to be doing. As a professional reviewer who spends a lot of time testing, I generally have a phobia of ugly apps.
- Which platforms will depend on what you personally use, but I didn't consider anything that doesn't sync between desktop and mobile. You really should be able to check your to-do list when you're at the store or otherwise out and about.

TextUtils App | *ReactJs* — Dec 2022

- Enter or paste the text you want to modify into the input field.
- Select the desired modification option from the available buttons.
- Convert the text to uppercase, lowercase, Copy the modified text to your clipboard and Paste text from your clipboard into the input field and Remove extra spaces within the text and Remove whole text from the input.
- The modified text will be displayed in the output field and You can copy the modified text from the output field or perform further modifications as needed..
- GitHub Repo

Bubble Game | *HTML, CSS, JavaScript* — Oct 2022

- I have created a simple using the logic used Html, css and JavaScript for frontend
