SUMMARY

Results-driven **Frontend Developer** with **3+ years of professional experience** building scalable and high-performance web applications for product-based platforms. Strong expertise in **React.js, Next.js, TypeScript, Tailwind CSS, Redux Toolkit, REST APIs, and responsive frontend architecture**. Experienced in building reusable component systems, authentication workflows, admin dashboards, performance optimization, and enterprise-grade frontend applications.

SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Redux Toolkit, Context API, Tailwind CSS, ShadCN UI, Material UI, Responsive Design

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Firebase Authentication, MongoDB

Tools & Platforms: Git, GitHub, Postman, VS Code, Jira, Render, Hostinger, CI/CD

Core Concepts: State Management, API Integration, Authentication, SEO Optimization, Accessibility, Performance Optimization, Lazy Loading, Code Splitting, Reusable Component Architecture

EXPERIENCE

The Strelema

Nov 2025 – Present

Web Developer

- Developed scalable frontend architectures using **React.js, TypeScript, Tailwind CSS, and shadcn/ui** for modern web applications.
- Built reusable component systems, dynamic dashboards, and responsive UI modules with optimized REST API integrations.
- Implemented JWT authentication, protected routes, role-based access control, and advanced frontend validation systems.
- Improved frontend performance through lazy loading, memoization, code splitting, and optimized rendering techniques reducing redundant API calls by 25%.
- Collaborated with backend developers and UI/UX teams to deliver scalable production-ready applications.

UC Services Pvt. Ltd.

Apr 2025 – Sep 2025

Junior Full Stack Developer

- Developed and maintained MERN-stack applications with responsive frontend modules and secure authentication workflows.
- Built modern UI systems using **React.js**, Tailwind CSS, and dynamic REST API integrations.
- Integrated Firebase authentication and JWT authorization improving onboarding security and user management workflows.
- Designed reusable frontend components and optimized rendering performance across multiple enterprise modules.
- Collaborated with teams to deploy production-ready applications on Render and Hostinger cloud platforms.

Tropon Technology

Dec 2022 – Jan 2025

Frontend Developer

- Developed responsive frontend applications for multiple client platforms using React.js and modern frontend technologies.
- Optimized frontend rendering performance and reduced bundle sizes for faster page loading experiences.
- Implemented scalable state management solutions using **Redux Toolkit** and Context API.

- Integrated REST APIs to dynamically manage and display application data across multiple frontend systems.
- Collaborated closely with UI/UX designers to deliver pixel-perfect responsive user interfaces.

PROJECTS

PollPandit Admin Panel

admin.pollpandit.com

- Developed scalable admin dashboard for survey management, analytics, validation workflows, and multi-role user systems.
- Built interactive charts, statistics dashboards, filtering systems, search functionality, pagination, and offline PWA support.
- Implemented secure role-based access control for Admin, Validator, Executive, and Visitor modules.
- Optimized frontend architecture and API handling for large-scale survey data rendering.
- **Stack:** React.js, Vite, Tailwind CSS, REST APIs, PWA

HRMS – Human Resource Management System

- Developed enterprise HRMS platform for employee management, payroll, attendance tracking, and organizational workflows.
- Built secure authentication systems and role-based modules for Admin, HR, and Employee management.
- Designed analytics dashboards, employee reports, onboarding workflows, and real-time data visualization systems.
- Implemented scalable frontend architecture using Redux Toolkit and reusable component systems.
- **Stack:** React.js, TypeScript, Redux Toolkit, Tailwind CSS, JWT

The Strelema – Business Website

strelema.com

- Developed responsive business website with reusable frontend architecture and optimized UI/UX systems.
- Improved SEO, accessibility, responsiveness, and frontend performance for better user experience.
- Implemented scalable component structure following modern frontend engineering best practices.
- **Stack:** React.js, TypeScript, Tailwind CSS

CONFIDENTIAL ENTERPRISE APPLICATIONS

- Worked on **4 confidential enterprise-grade applications** across **political consulting, financial systems, workflow automation, analytics dashboards, and internal operational platforms.**
- Developed scalable frontend architectures for **political survey management systems, election analytics dashboards, financial reporting modules, and enterprise management platforms.**
- Built reusable frontend systems, API-driven modules, responsive dashboards, and secure authentication workflows for high-scale enterprise applications.
- Implemented role-based access control systems, optimized rendering performance, advanced filtering, reporting workflows, and reusable component architecture.
- Collaborated with cross-functional teams to deliver production-ready applications under NDA agreements while maintaining performance, scalability, and security standards.
